Part III DETAILED ACTION

1. The specification on page 1 should be amended to reflect the status of the parent applications.
2. Claims 31-43 are pending.
3. The restriction requirement in reference to antibodies to the specific fragments of SEQ ID NO. 13 has been vacated. Since Applicant's arguments in the election with traverse of Antibodies was limited to arguing the fragment election, only that part of the restriction has been addressed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 31, 40 and 41 are rejected under 35 U.S.C. § 102(b) as being anticipated by Goding. (U).

Goding teaches Fc antibody fragments, wherein said antibody would non-specifically bind to the epitopes of SEQ ID NO. 13. Applicant is notified that amending the claims to recite "an antigen binding fragment thereof, that specifically binds" instead of antibody fragment, that binds to, would remove the rejection.

The prior art teachings anticipate the claimed invention.

5. Applicant is notified that claims 32-39 and 42-43 are objected to as being dependent upon rejected claims.
